Interaction & Implementation Blueprint

Overview

Research

Students

Countries

All interaction rules belong inside the dashboard screens.

01 Navigation

Four dashboard views with a consistent navigation control.

02 Embedded filters

Every dashboard contains its own filter ribbon. There is NO separate filter sheet.

03 Filter hierarchy

University views: Region → Country → University. Country Comparison: Region + Country A/B/C.

04 Selection & highlight

Selecting a mark highlights related information while preserving context.

05 Tooltips

Show metric, value, period and current geographic/institution context.

06 Reset

Reset control inside each dashboard returns the screen to All/Global.

07 Coordinated comparison

Country selections update benchmark matrix, leader board and gap finder together.

08 Tableau build

Implement the four screens in eduvision_prototype.twbx using the Module 3 dataset.

09 QA & approval

Verify navigation, filters, highlighting, tooltips, reset, formatting and comparison behavior.

DELIVERABLES

dashboard_storyboard.pdf + eduvision_prototype.twbx

KEY PRINCIPLE

Filters are integrated into each dashboard — no separate filter page.
