

EduVision — Higher Education Performance Dashboard

Module 4: Dashboard Planning & Prototyping

Prototype basis: the existing Tableau workbook supplied with the project is reused; no new dashboard workbook was designed from scratch.

Dashboard	Primary layout / visuals	Filters	Navigation / actions
University Overview	Top university rankings; global distribution; academic reputation; performance by region; university categories	Country, Region, University, Performance Category	University selection → scorecard/details; global filter controls
Research Analytics	Publications/research indicators; citations; research productivity; top research institutions; research trends	Country, Region, University	Institution selection and cross-dashboard filtering
Student Analytics	International students; faculty-to-student ratio; diversity; enrollment; student distribution	Country, Region, University	Student/country selections propagate to comparison views
Country Comparison	Country ranking comparison; benchmark dot plot; regional trends; top-performing countries; map	Country, Region	Country selection and global navigation

Prototype verification checklist

- Four required dashboard names are present in the supplied Tableau workbook.
- Global filters, navigation controls, parameter actions and dashboard linking are documented as the intended interaction model.
- The supplied workbook is retained as the prototype/final dashboard baseline; no replacement Tableau dashboard was generated.
