

EduVision_DV

Higher Education Performance Dashboard

Module 8 – Documentation & Project Delivery

This document provides the final project documentation and delivery reference for EduVision_DV. The content follows the project brief, final education dataset, and final Tableau workbook.

1. Project Overview

EduVision_DV is a higher education analytics dashboard suite designed to analyze university rankings, research performance, student diversity, academic excellence, and global education trends. The final output is a unified Tableau workbook containing four interconnected dashboards.

2. Project Objectives

- Collect and integrate university ranking datasets.
- Clean and transform education data for analysis.
- Engineer education-focused KPIs.
- Develop four interactive Tableau dashboards.
- Integrate dashboards using filters, parameters and actions.
- Validate calculations, dashboard interactions and educational metrics.
- Document and deliver the completed project.

3. Project Workflow

Data Collection → Data Cleaning & Transformation → Education KPI Engineering → Dashboard Planning & Prototyping → Dashboard Development → Dashboard Integration → Testing & Validation → Documentation & Delivery

4. Dashboard Guide

University Overview – Provides an overview of university ranking and academic performance, including ranking distribution, academic reputation and institutional comparison.

Research Analytics – Focuses on research performance, publications/citations, research productivity and research impact comparison.

STUDENT ANALYTICS – Focuses on international students, faculty-to-student ratio, diversity trends, enrollment comparisons and student distribution.

COUNTRY COMPARISON – Supports country-level ranking comparison, education benchmarking, regional trends and comparison of top-performing countries.

5. KPI Definitions

KPI	Definition
Global Ranking Score	Mean of Overall Score and Overall SCORE
Research Impact Score	Mean of Research Quality and Citations per Faculty SCORE
Faculty-to-Student Ratio	Mean of Students to Staff Ratio and Faculty Student Ratio SCORE
International Student Percentage	Mean of International Students and International Student SCORE
Academic Reputation Score	Mean of Academic Reputation SCORE and Employer Reputation SCORE
Research Productivity Index	Mean of Research Environment and Industry Impact

6. Dataset & Data Processing

The final education dataset contains 879 records. The final Total Universities KPI is validated at 879. Data preparation includes numeric conversion and creation of the project KPI fields used by the dashboard suite.

7. Technology Stack

Python; Pandas; NumPy; QS World University Rankings; Times Higher Education World University Rankings; Tableau Desktop/Public; Tableau Filters, Parameters and Actions; Markdown/GitHub.

8. Testing & Validation

Module 7 covers testing and validation of the final dataset, KPI fields, dashboard inventory, dashboard integration and release readiness. The Module 8 delivery package references the completed testing documentation rather than duplicating it.

9. Final Deliverables

- Final Tableau workbook: EduVision_DV.twbx
- Final education dataset: university_final_dataset(1).xlsx
- Module 7 Testing Checklist
- Module 7 Testing & Validation Report
- Module 8 Project Documentation
- Module 8 Project Delivery Checklist
- Module 8 README

10. Project Delivery Structure

The project is organized module-wise in GitHub from Module 1 through Module 8. Module 8 contains the final documentation and delivery artifacts required for project handover and portfolio/reference use.

11. Delivery Status

Documentation and delivery package prepared for Module 8.
